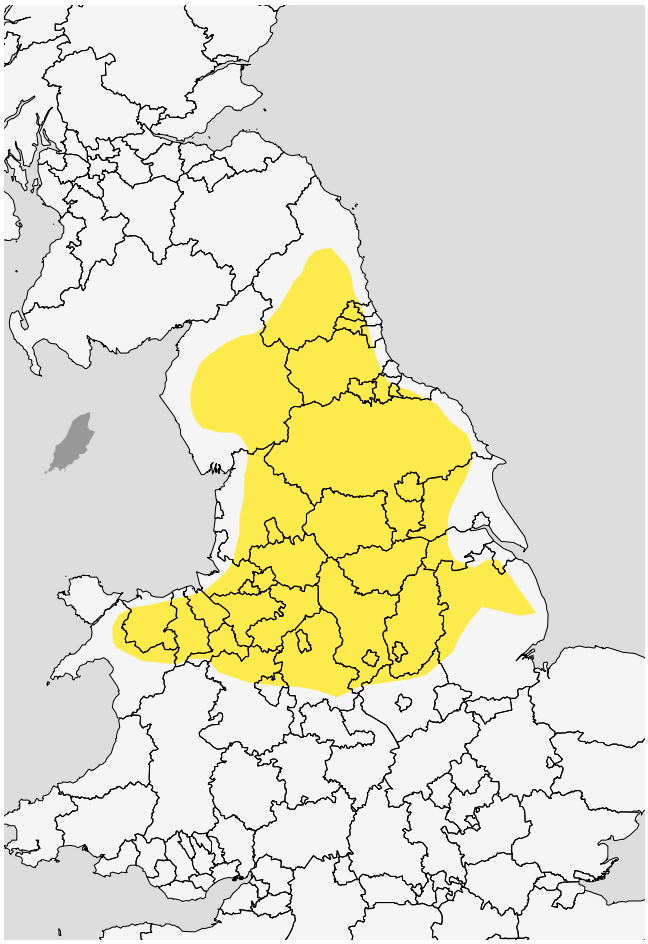
Yellow warning
Snow & Ice

Between
19:00 Mon 18 Nov 2024 and
10:00 Tue 19 Nov 2024



A spell of snow may bring disruption during Monday night and Tuesday morning.

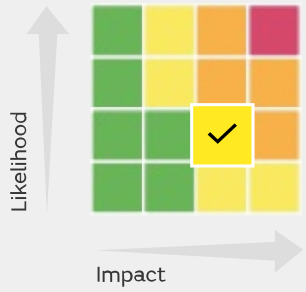
What to expect

- Possible travel delays on roads stranding some vehicles and passengers
- Possible delays or cancellations to rail and air travel
- Some rural communities could become cut off
- Power cuts may occur and other services, such as mobile phone coverage, may be affected
- A chance of injuries from slips and falls on icy surfaces
- Bus and train services may be delayed or cancelled, with some road closures and longer journey times possible

Further details

A period of rain, sleet and snow will occur during Monday evening, overnight into Tuesday morning.

The most likely scenario is for most of the snow to accumulate on hills, with 5 to 10 cm possible above 200 metres and perhaps as much as 15 to 20 cm above 300 metres. There is a chance of snow settling at lower levels, where 5 to 10 cm would prove much more disruptive - this remains uncertain, but seems most likely across parts of Yorkshire and Derbyshire.



✓ Low likelihood of medium impacts

Yellow warning
Snow & Ice

Between
19:00 Mon 18 Nov 2024 and
10:00 Tue 19 Nov 2024

Further Details (continued)

As rain, sleet and snow clear on Tuesday morning, ice may form on untreated surfaces.

What should I do?

Snowy, wintry weather can cause delays and make driving conditions dangerous, so to keep yourself and others safe: plan your route, checking for delays and road closures, amending your travel plans if necessary; if driving, leave more time to prepare and check your car before setting off; make sure you have essentials packed in your car in the event of any delays (warm clothing, food, water, a blanket, a torch, ice scraper/de-icer, a warning triangle, high visibility vest and an in-car phone charger).

People cope better when they have prepared in advance for the risk of power cuts or being cut off from services and amenities due to the snow. It's easy to do; consider gathering torches and batteries, a mobile phone power pack and other essential items.

Be prepared for weather warnings to change quickly: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.

Reason for update

The warning area has been adjusted slightly, mainly to remove it from southern Scotland, whilst the likelihood of impacts has increased.
